PROFESSIONAL SUMMARY

Final-year B.Tech (Artificial Intelligence and Data Science) student with hands-on experience in Computer Vision, Deep Learning and Generative AI. Built real-time object detection systems with YOLOv8 and OpenCV, and developed LLM-based chatbots and AI agents during internships. Currently a Research Intern at IIT Jammu, working on AI-based defect detection for additive manufacturing. Published research author (IJCOT). Seeking a Machine Learning / Data Scientist role to build and deploy production-grade AI solutions.

TECHNICAL SKILLS

Programming: Python, Java

Machine Learning & Deep Learning: Supervised/Unsupervised Learning, Neural Networks, Model Evaluation, Optimization

Computer Vision: Object Detection, Image Classification, YOLOv8, OpenCV, MediaPipe

Generative AI: LLM Chatbots, AI Agents, Model Context Protocol (MCP), Custom Model Integration

Libraries & Frameworks: TensorFlow, Keras, Pandas, NumPy, Flask, Streamlit

Databases & Tools: MySQL, MongoDB, Firebase, Git, GitHub, REST APIs, n8n (Workflow Automation)

PROFESSIONAL EXPERIENCE

Research Intern | IIT Jammu *Jun 2026 – Jul 2026*

- Researched ML and deep learning methods for in-situ defect detection in continuous carbon fibre 3D printing.
- Developed computer vision algorithms for real-time quality assurance and inspection of 3D-printed composites.
- Explored model optimization techniques for edge-device deployment in industrial environments.

GenAI Developer Intern | Dotcom Infoway *Jun 2025 – Jul 2025*

- Developed responsive GenAI chatbots with custom Python models for real-time conversation and user engagement.
- Built autonomous AI agents and Model Context Protocol (MCP) integrations in Python.

Student Innovator | Innovation Research Park (IRP), K.L.N. College of Engineering *Feb 2024 – Present*

- Designed Borrow Booksy, an AI-enabled community book rental application with GenAI-powered recommendations.

PROJECTS

In-Situ Defect Detection in Continuous Carbon Fibre 3D Printing *YOLOv27, Deep Learning,Machine Learning*

- Built an AI-based quality monitoring system to detect defects in continuous carbon fibre 3D-printed specimens.
- Applied computer vision, ML and deep learning to classify Under-Extrusion, Over-Extrusion and Good Print Quality.
- Contributed to image preprocessing, dataset preparation and defect annotation; built a YOLO-based pipeline.

Real-Time Surveillance System *YOLOv8, OpenCV, Python,Machine Learning*

- Developed a real-time person detection system for crowded environments using YOLOv8 and OpenCV.

AI Research Paper Generator *Python, Generative AI*

- Built an AI-powered tool that generates research papers in multiple journal and conference layouts.
- Integrated a plagiarism checker and a text humanizer to produce original, publication-ready papers.

Borrow Booksy: Community Book Rental System *Flutter, GenAI, Firebase*

- Developed a mobile-first rental platform with authentication, inventory management and rental analytics.
- Integrated GenAI for personalized book recommendations and automated resource distribution.

EDUCATION

B.Tech, Artificial Intelligence and Data Science (Honors) *2023 – 2027*

K.L.N. College of Engineering, Sivagangai | CGPA: 8.0 / 10 (up to 6th Semester)

PUBLICATION

- Published “Borrow Booksy: AI-Enhanced Community Book Rental System” in IJCOT.

LEADERSHIP

- Student Coordinator, AISTHETICA Symposium 2026: Led a five-activity AI and Data Science event and managed cross-functional teams.
